

Forge Motorsport - Uprated chargecooler radiator kits for the Audi S4 (B8 Chassis) 3.0TFSI.

Page 1 of 4

P/N: FMCCRAD1

This kit has been developed to fit the Audi S4 3.0TFSI fitted with a **Single** OEM chargecooler radiator. The OEM chargecooler is located in front of the main radiator. This comprehensive kit allows the engine and chargecooler coolant to be separated as well as the improved cooling of the larger chargecooler radiator, giving better control over chargecooler coolant temperatures and recovery times. This kit is supplied with a CNC machined billet Forge expansion cap cover.

Audi S4 (B8) Chargecooler feed/return pipework:

Visible at the front of the engine and from underneath these pipes transfer coolant to and from the chargercooler and chargecooler radiator. On the later B8.5 Chassis this pipework is different (see image at the end of text).

Additional information:

Audi S5 – B8.5 Chassis

P/N: **FMCCRADS53T**

Already in production is the Forge Motorsport S5 (B8.5) chargecooler Kit. The main difference between the kits is the routing of the coolant.

The coolant feed pipe visible at the front of the engine, both point in the same direction.
